Decoration Cement

iLoft Hybrid Floor

iLoft hybrid Floor is decorative or resurfacing product with the look of polished concrete. It is used in decorative floor finishes, Columns, Ceiling, Building entrances, Residencial & Commercial Buildings. iLoft hybrid floor coating can be applied over various surfaces including Concrete, Cement board, Gypsum board and Smartboard.

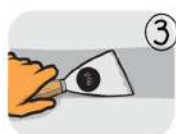

Application Instruction for Matt Top Coat

Mix cement with clean water in a ratio of 3:1 and stir until well blended.

Roll the primer 1 time. Let it dry for about 30 minutes.

Use a steel trowel to apply the first coat over the entire floor and wait dry for about 45-60 mins

Use a steel trowel to apply the second coat to create a pattern.

Let it dry for at least 12 hours

Rolling iLOFT Hybrid Floor coating 1-2 times.

To increase premium matt look and durability with water-based floor coating (less odor)

Step for using iLOFT Hybride floor coating

1. For the first coat, divide some of the coating and mix with water ratio 1:1. Then use a roller to roll onto the completely dry surface. Wait for 45-60 minutes to dry.
2. Apply the second coat without mixing with water. Wait for 45-60 minutes to dry.
3. If you want more durability and matt look can apply a third coat.
